I. PURPOSE AND SCOPE

This Program Management Procedure (PMP) describes the National Spent Nuclear Fuel Program (NSNFP) process for personnel indoctrination and proficiency training. The PMP applies to all personnel including staff augmentation assigned to perform work described by NSNFP procedures.

Training, qualification, and proficiency maintenance activities for NSNFP Quality Assurance (QA) assessment team members (lead auditors, auditors, and technical specialists) are described by and performed in accordance with NSNFP procedure QAS 18.04.

Personnel indoctrination and proficiency training is not required for personnel in positions and functions not specifically described by this procedure.

II. SUMMARY

The Program Support Organization (PSO) of the NSNFP coordinates the NSNFP training program described by this procedure through a designated Training Coordinator.

The procedure provides communication of new or changed personnel assignments in relation to functional responsibilities. The procedure provides documentation of the indoctrination and proficiency training associated with the functional positions and establishes the training methods to be used. The procedure also provides a method to alert NSNFP personnel when a NSNFP procedure has been issued or changed.

The method to alert personnel of issued procedures or changes may only be applied to administrative procedures unrelated to *special processes* (see glossary) that are subject to the requirements of Quality Assurance Requirements and Description (QARD) Section 9. This procedure requires training of NSNFP personnel prior to issuing a NSNFP procedure that governs the NSNFP personnel performance in a special process. Typically NSNFP personnel do not perform special processes.

The process described by this procedure relies in part on the completion of a NSNFP Proficiency Training Needs Determination that is generated during the NSNFP document review and approval process.
